INDEX TO AUTHORS

A

Albanese, Anthony A., Irby, Virginia, and Lein, Marilyn. The utilization of D-amino acids by man. VII. Phenylalanine, 731

Angier, R. B. See *Hutchings, Mowat, Oleson, Stokstad, Boothe, Waller, Angier, Semb, and SubbaRow,* 323

Anslow, William P., Jr., and du Vigneaud, Vincent. The cleavage of the stereoisomers of cystathionine by liver extract, 245

Artom, Camillo, and Fishman, William H. The relation of the diet to the composition of tissue phospholipides. VII. Effects of lactose-containing diets, 587

B

Badger, Shirley J. See *Pillemer, Toll, and Badger,* 571

Baer, Erich, and Fischer, Hermann O. L. Naturally occurring glycerol ethers. III. Selachyl alcohol and its geometrical isomer, 337

Balls, A. K. See *Jansen, Nutting, and Balls,* 417

Barker, H. A. See *Doudoroff, Barker, and Hassid,* 147

Barron, E. S. Guzman. See *Bartlett and Barron,* 67

—. See *Kalnitsky and Barron,* 83

Barry, Guy T. See *Sato, Barry, and Craig,* 501

Bartlett, Grant R., and Barron, E. S. Guzman. The effect of fluoroacetate on enzymes and on tissue metabolism. Its use for the study of the oxidative pathway of pyruvate metabolism, 67

Bentley, Orville G., Snell, Esmond E., and Phillips, Paul H. A microbiological method for the determination of manganese, 343

Berg, Clarence P., and Rohse, Wayne G. The tryptophan content of normal human urine, 725

Bird, O. D. See *Mims, Swendseid, and Bird,* 367

Blanchard, Marian L. See *Ochoa, Mehler, Blanchard, Jukes, Hoffmann, and Regan,* 413

Bloor, W. R. A colorimetric procedure for the determination of small amounts of fatty acid, 671

Blum, Amos E. See *Horn, Jones, and Blum,* 719

Boothe, J. H. See *Hutchings, Mowat, Oleson, Stokstad, Boothe, Waller, Angier, Semb, and SubbaRow,* 323

Boxer, George E., and Jelinek, Viola C. A chemical method for the determination of streptomycin in blood and spinal fluid, 491

Broquist, Harry P. See *Williams, Broquist, and Snell,* 619

Brown, Ellis V. See *Grenfell, Means, and Brown,* 527

Burris, R. H. See *Leonard and Burris,* 701

C

Caldwell, M. J., and Hughes, J. S. Effect of temperature on fading of the Carr-Price colors of vitamin A and common carotenoid pigments, 97

Cantarow, A. See *Pearlman, Rakoff, Cantarow, and Paschkis,* 173

Carter, Herbert E., Glick, Francis J., Norris, William P., and Phillips, George E. Biochemistry of the sphingolipides. III. Structure of sphingosine, 285

— **and Neville, Harriet E.** Oxidation of hydroxyproline by periodate, 301

—, **Norris, William P., Glick, Francis J., Phillips, George E., and Harris, Roberta.** Biochemistry of the sphingolipides. II. Isolation of dihydrosphingosine from the cerebroside fractions of beef brain and spinal cord, 269

—, —, **and Rockwell, Harriet E.** Biochemistry of the sphingolipides. IV. Synthesis of compounds related to sphingosine, 295

Chanutin, Alfred. See *Gjessing, Ludewig, and Chanutin,* 551

Clark, Leland C., Jr., and **Kochakian, Charles D.** The *in vitro* metabolism of testosterone to Δ^4-androstenedione-3,17, *cis*-testosterone, and other steroids by rabbit liver slices, 23

Cohen, Philip P., and **Hayano, Mika.** The conversion of ornithine to citrulline by rat liver homogenates, 687

Cohn, Mildred. See *Simmonds, Cohn, and du Vigneaud,* 631

Comar, C. L., and **Davis, George K.** Cobalt metabolism studies. IV. Tissue distribution of radioactive cobalt administered to rabbits, swine, and young calves, 379

Corcoran, A. C., and **Page, Irvine H.** A method for the determination of mannitol in plasma and urine, 165

Cori, Carl F. See *Krahl and Cori,* 607

Craig, Lyman C. See *Sato, Barry, and Craig,* 501

Cravens, W. W. See *Nichol, Robblee, Cravens, and Elvehjem,* 419

Crombe, David. See *Miller and Kozloff,* 105

Cubiles, Ricardo. See *Schmidt, Cubiles, Swartz, and Thannhauser,* 759

D

Daniel, Esther P., and **Kline, O. L.** Factors affecting folic acid determination, 739

Daniel, Louise J., and **Norris, L. C.** Growth inhibition of bacteria by synthetic pterins. II. Studies with *Escherichia coli*, *Staphylococcus aureus*, and *Lactobacillus arabinosus* showing synergism between pterin and sulfonamide, 747

Davis, George K. See *Comar and Davis,* 379

Delluva, Adelaide M. See *Gurin and Delluva,* 545

Deodhar, Tara. See *Henderson, Deodhar, Krehl, and Elvehjem,* 261

Doudoroff, Michael, Barker, H. A., and **Hassid, W. Z.** Studies with bacterial sucrose phosphorylase. III. Arsenolytic decomposition of sucrose and of glucose-1-phosphate, 147

E

Elkins, Elaine. See *Neurath, Elkins, and Kaufman,* 221

Elvehjem, C. A. See *Henderson, Deodhar, Krehl, and Elvehjem,* 261

—. See *Nichol, Robblee, Cravens, and Elvehjem,* 419

F

Fieger, E. A. See *Williams and Fieger,* 399

Fischer, Hermann O. L. See *Baer and Fischer,* 337

Fishman, William H. See *Artom and Fishman,* 587

Fruton, Joseph S. See *Simmonds, Tatum, and Fruton,* 483

—. See *Yudkin and Fruton,* 421

G

Gjessing, Erland C., Ludewig, Stephan, and **Chanutin, Alfred.** Fractionation, electrophoresis, and chemical studies of proteins in sera of control and injured dogs, 551

Glick, Francis J. See *Carter, Glick, Norris, and Phillips,* 285

—. See *Carter, Norris, Glick, Phillips, and Harris,* 269

Goldberg, Alfred, and **Haas, Erwin.** Separation of antivasin I into two components, 757

Graham, W. Donald. See *Spaulding and Graham,* 711

Grau, C. R. Interrelations of phenylalanine and tyrosine in the chick, 661

Grenfell, Thomas C., Means, John A., and **Brown, Ellis V.** Studies on the naturally occurring penicillins. An assay method for penicillin G, 527

Grisolia, Santiago, and **Vennesland, Birgit.** Carbon dioxide fixation in isocitric acid, 461

Gunsalus, I. C., and Umbreit, W. W. Codecarboxylase not the 3-phosphate of pyridoxal, 415
—. See *O'Kane and Gunsalus*, 425, 433
—. See *Wood, Gunsalus, and Umbreit*, 313
Gurin, Samuel, and Delluva, Adelaide M. The biological synthesis of radioactive adrenalin from phenylalanine, 545

H

Haas, Erwin. See *Goldberg and Haas*, 757
Harris, Roberta. See *Carter, Norris, Glick, Phillips, and Harris*, 269
Hassid, W. Z. See *Doudoroff, Barker, and Hassid*, 147
Hayano, Mika. See *Cohen and Hayano*, 687
Henderson, L. M., Deodhar, Tara, Krehl, W. A., and Elvehjem, C. A. Factors affecting the growth of rats receiving niacin-tryptophan-deficient diets, 261
Hoffmann, Conrad E. See *Ochoa, Mehler, Blanchard, Jukes, Hoffmann, and Regan*, 413
Horn, Millard J., Jones, D. Breese, and Blum, Amos E. Microbiological determination of valine in proteins and foods, 719
Huebner, Charles F., and Jacobs, Walter A. The aconite alkaloids. XVIII. The synthesis of the hydrocarbon obtained on dehydrogenation of atisine, 203
— and —. XX. Further studies with atisine and isoatisine, 515
— and —. The veratrine alkaloids. XXVI. On the hexanetetracarboxylic acid from cevine and germine, 181
—. See *Jacobs and Huebner*, 189, 209, 635
Huggins, Charles, and Lapides, Jack. Chromogenic substrates. IV. Acyl esters of *p*-nitrophenol as substrates for the colorimetric determination of esterase, 467
Huggins, Charles, and Smith, Dwight Raymond. Chromogenic substrates. III. *p*-Nitrophenyl sulfate as a substrate for the assay of phenolsulfatase activity, 391
Hughes, J. S. See *Caldwell and Hughes*, 97
Hutchings, B. L., Mowat, J. H., Oleson, J. J., Stokstad E. L. R., Boothe, J. H., Waller, C. W., Angier, R. B., Semb, J., and SubbaRow, Y. Pteroylaspartic acid, an antagonist for pteroylglutamic acid, 323

I

Irby, Virginia. See *Albanese, Irby, and Lein*, 731

J

Jacobs, Walter A., and Huebner, Charles F. The aconite alkaloids. XVII. Further studies with hetisine, 189
— and —. XIX. Further studies with delphinine derivatives, 209
— and —. The veratrine alkaloids. XXVII. Further studies with jervine, 635
—. See *Huebner and Jacobs*, 181, 203, 515

Jelinek, Viola C. See *Boxer and Jelinek*, 491
Jones, D. Breese. See *Horn, Jones, and Blum*, 719
Jones, M. J. See *Lampen and Jones*, 133
Jukes, Thomas H. See *Ochoa, Mehler, Blanchard, Jukes, Hoffmann, and Regan*, 413

K

Kalckar, Herman M., and Rittenberg, D. Rejuvenation of muscle adenylic acid nitrogen *in vivo* studied with isotopic nitrogen, 455

Kalnitsky, George, and **Barron, E. S. Guzman.** The effect of fluoroacetate on the metabolism of yeast and bacteria, 83
Kaufman, Seymour. See *Neurath, Elkins, and Kaufman,* 221
Kazenko, Anna. See *Keith, Kazenko, and Laskowski,* 227
Keith, Cecilia K., Kazenko, Anna, and **Laskowski, M.** Studies on proteolytic activity of crystalline protein B prepared from beef pancreas, 227
Kies, Marian W. Activation of soy bean lipoxidase, 121
Kingsland, Nelson. See *Wood, Williams, and Kingsland,* 251
Klein, J. Raymond, and **Olsen, Norman S.** Inhibitory effect of kojic acid upon oxidations mediated by liver and kidney, 151
Kline, O. L. See *Daniel and Kline,* 739
Kochakian, Charles D. See *Clark and Kochakian,* 23
Kozloff, Lloyd M. See *Miller and Kozloff,* 105
Krahl, M. E., and **Cori, Carl F.** The uptake of glucose by the isolated diaphragm of normal, diabetic, and adrenalectomized rats, 607
Krehl, W. A. See *Henderson, Deodhar, Krehl, and Elvehjem,* 261
Kun, Ernest. Microdetermination of manganese in biological material by means of catalysis, 509

L

Lampen, J. O., and **Jones, M. J.** The growth-promoting and antisulfonamide activity of *p*-aminobenzoic acid, pteroylglutamic acid, and related compounds for *Lactobacillus arabinosus* and *Streptobacterium plantarum,* 133
Lapides, Jack. See *Huggins and Lapides,* 467
Laskowski, M. See *Keith, Kazenko, and Laskowski,* 227
Lein, Marilyn. See *Albanese, Irby, and Lein,* 731
Leonard, Mary Jane Kreko, and **Burris, R. H.** A survey of transaminases in plants, 701
Levitas, Nora. See *Robinson, Levitas, Rosen, and Perlzweig,* 653
Lichstein, Herman C., and **Umbreit, W. W.** Biotin activation of certain deaminases, 423
— and —. A function for biotin, 329
Ludewig, Stephan. See *Gjes ing, Ludewig, and Chanutin,* 551
Lugovoy, Julius K. See *Natelson, Lugovoy, and Pincus,* 597

M

MacLeod, Robert A., and **Snell, Esmond E.** Some mineral requirements of the lactic acid bacteria, 351
McIntire, Floyd C., Roth, L. W., and **Shaw, J. L.** The purification of histamine for bioassay, 537
Means, John A. See *Grenfell, Means, and Brown,* 527
Mehler, Alan. See *Ochoa, Mehler, Blanchard, Jukes, Hoffmann, and Regan,* 413
Meyerhof, Otto, and **Oesper, Peter.** The mechanism of the oxidative reaction in fermentation, 1
Miller, Zelma Baker, and **Kozloff, Lloyd M.** The ribonuclease activity of normal and parasitized chick erythrocytes, 105
Mills, Mary B., and **Roe, Joseph H.** A critical study of proposed modifications of the Roe and Kuether method for the determination of ascorbic acid, with further contributions to the chemistry of this procedure, 159
Mims, Virginia, Swendseid, Marian E., and **Bird, O. D.** The inhibition of pteroylglutamic acid conjugase and its reversal. The effect of nucleic acid- and sulfhydryl-combining reagents, 367
Mowat, J. H. See *Hutchings, Mowat, Oleson, Stokstad, Boothe, Waller, Angier, Semb, and SubbaRow,* 323

N

Natelson, Samuel, Lugovoy, Julius K., and **Pincus, Joseph B.** Determination of micro quantities of citric acid in biological fluids, 597

Natelson, Samuel, and **Zuckerman, Joseph L.** Burette for microtitration; vernier applicable to the capillary micro burette, 305

Neurath, Hans, Elkins, Elaine, and **Kaufman, Seymour.** The antipodal specificity and inhibition of crystalline carboxypeptidase, 221

Neville, Harriet E. See *Carter and Neville,* 301

Nichol, C. A., Robblee, A. R., Cravens, W. W., and **Elvehjem, C. A.** Activity of antipernicious anemia preparations in chicks, 419

Norris, L. C. See *Daniel and Norris,* 747

Norris, William P. See *Carter, Glick, Norris, and Phillips,* 285

—. See *Carter, Norris, Glick, Phillips, and Harris,* 269

—. See *Carter, Norris, and Rockwell,* 295

Nutting, Marvel-Dare Fellows. See *Jansen, Nutting, and Balls,* 417

O

Ochoa, Severo, Mehler, Alan, Blanchard, Marian L., Jukes, Thomas H., Hoffmann, Conrad E., and **Regan, Margaret.** Biotin and carbon dioxide fixation in liver, 413

Oesper, Peter. See *Meyerhof and Oesper,* 1

O'Kane, Doreen E., and **Gunsalus, I. C.** Aspartic-alanine transaminase, an artifact, 433

— and —. The resolution and purification of glutamic-aspartic transaminase, 425

Oleson, J. J. See *Hutchings, Mowat, Oleson, Stokstad, Boothe, Waller, Angier, Semb, and SubbaRow,* 323

Olsen, Norman S. See *Klein and Olsen,* 151

P

Page, Irvine H. See *Corcoran and Page,* 165

Paschkis, K. E. See *Pearlman, Rakoff, Cantarow, and Paschkis,* 173

Pearlman, W. H., Rakoff, A. E., Cantarow, A., and **Paschkis, K. E.** The isolation of estrone from the bile of pregnant cows, 173

Peng, Da-Hwei. See *Watts and Peng,* 441

Williams, William L., Broquist, Harry P., and **Snell, Esmond E.** Oleic acid and related compounds as growth factors for lactic acid bacteria, 619

Wood, John L., Williams, Edward F., Jr., and **Kingsland, Nelson.** The conversion of thiocyanate sulfur to sulfate in the white rat, 251

Wood, W. A., Gunsalus, I. C., and **Umbreit, W. W.** Function of pyridoxal phosphate: resolution and purification of the tryptophanase enzyme of *Escherichia coli*, 313

Y

Yudkin, Warren H., and **Fruton, Joseph S.** The activation of dehydropeptidase by zinc, 421

Z

Zapp, John A., Jr. See *Stadie and Zapp*, 55

Zuckerman, Joseph L. See *Natelson and Zuckerman*, 305

INDEX TO SUBJECTS

A

Acetone: N^1-Methylnicotinamide and, condensation product, fluorescent, *Robinson, Levitas, Rosen, and Perlzweig,* 653

Acetylesterase: Plant, diisopropyl fluorophosphate effect, *Jansen, Nutting, and Balls,* 417

Aconite: Alkaloids, *Jacobs and Huebner,* 189
Huebner and Jacobs, 203
Jacobs and Huebner, 209
Huebner and Jacobs, 515

Adenylic acid: Nitrogen, muscle, rejuvenation *in vivo,* isotopic nitrogen in study, *Kalckar and Rittenberg,* 455

Adrenalectomy: Glucose uptake, diaphragm, effect, *Krahl and Cori,* 607

Adrenalin: Radioactive, biological synthesis from phenylalanine, *Gurin and Delluva,* 545

Alanine: Aspartic-, transaminase, *O'Kane and Gunsalus,* 433
Phenyl-. *See* Phenylalanine

Alkaloid(s): Aconite, *Jacobs and Huebner,* 189
Huebner and Jacobs, 203
Jacobs and Huebner, 209
Huebner and Jacobs, 515
Veratrine, *Huebner and Jacobs,* 181
Jacobs and Huebner, 635

Amino acid(s): D-, utilization, *Albanese, Irby, and Lein,* 731

Aminobenzoic acid: *p*-, *Lactobacillus arabinosus* and *Streptobacterium planatarum,* effect, *Lampen and Jones,* 133

Androstenedione-3,17: Δ^4-, testosterone metabolism, liver effect, *Clark and Kochakian,* 23

Anemia: Pernicious, anti-, preparations, activity, chick, *Nichol, Robblee, Cravens, and Elvehjem,* 419

Antinvasin: I, separation, *Goldberg and Haas,* 757

Antistiffness factor: Liver metabolism, *in vitro,* effect, *Simonsen and van Wagtendonk,* 239

Apparatus: Burette, micro, with vernier, *Natelson and Zuckerman,* 305

Arginine: Citrulline from, enzyme mechanism, *Ratner,* 761

Arsenate: Glucose-1-phosphate decomposition, effect, *Doudoroff, Barker, and Hassid,* 147
Sucrose decomposition, effect, *Doudoroff, Barker, and Hassid,* 147

Ascorbic acid: Determination, Roe-Kuether method, modification, *Mills and Roe,* 159

Aspartic: -Alanine transaminase, *O'Kane and Gunsalus,* 433
Glutamic-, transaminase, resolution and purification, *O'Kane and Gunsalus,* 425

Aspartic acid: Pteroyl-, pteroylglutamic acid, relation, *Hutchings, Mowat, Oleson, Stokstad, Boothe, Waller, Angier, Semb, and SubbaRow,* 323

Atisine: *Huebner and Jacobs,* 515
Hydrocarbon, synthesis, *Huebner and Jacobs,* 203
Iso-, *Huebner and Jacobs,* 515

B

Bacillus: *See also Lactobacillus*

Bacteria: Growth, pterins, synthetic, effect, *Daniel and Norris,* 747
Lactic acid, growth, oleic acid and related compounds, effect, *Williams, Broquist, and Snell,* 619
— —, mineral requirements, *MacLeod and Snell,* 351
Metabolism, fluoroacetate effect, *Kalnitsky and Barron,* 83
Sucrose phosphorylase, *Doudoroff, Barker, and Hassid,* 147
See also Escherichia, Staphylococcus, Streptobacterium

Bean: Soy, lipoxidase, *Kies,* 121

Benzoic acid: *p*-Amino-. *See* Aminobenzoic acid
Bile: Estrone isolation, pregnancy, *Pearlman, Rakoff, Cantarow, and Paschkis,* 173
Biotin: Deaminases, effect, *Lichstein and Umbreit,* 423
Fixation, liver, *Ochoa, Mehler, Blanchard, Jukes, Hoffmann, and Regan,* 413
Function, *Lichstein and Umbreit,* 329
Blood: Streptomycin determination, chemical, *Bozer and Jelinek,* 491
Blood cell(s): Red, parasitized, chick, ribonuclease activity, *Miller and Kozloff,* 105
Blood plasma: Mannitol determination, *Corcoran and Page,* 165
Blood serum: Proteins, injury effect, *Gjessing, Ludewig, and Chanutin,* 551
Brain: Cerebroside, dihydrosphingosine isolation, *Carter, Norris, Glick, Phillips, and Harris,* 269
Phospholipide cleavage, *Sperry,* 675
Burette: Micro, and vernier, *Natelson and Zuckerman,* 305

C

Carbon dioxide: Fixation, isocitric acid, *Grisolia and Vennesland,* 461
—, liver, *Ochoa, Mehler, Blanchard, Jukes, Hoffmann, and Regan,* 413
Carboxylase: Code-, pyridoxal-3-phosphate relation, *Gunsalus and Umbreit,* 415
Carboxypeptidase: Crystalline, *Neurath, Elkins, and Kaufman,* 221
Carotenoid(s): Pigments, Carr-Price colors, temperature effect, *Caldwell and Hughes,* 97
Carr-Price: Reagent, temperature effect, *Caldwell and Hughes,* 97
Cerebroside(s): Brain and cerebrospinal cord, dihydrosphingosine isolation, *Carter, Norris, Glick, Phillips, and Harris,* 269
Cerebrospinal cord: Cerebroside, dihydrosphingosine isolation, *Carter, Norris, Glick, Phillips, and Harris,* 269
Cerebrospinal fluid: Streptomycin determination, chemical, *Bozer and Jelinek,* 491
Cevine: Hexanetetracarboxylic acid, *Huebner and Jacobs,* 181
Chick: Antipernicious anemia preparations, effect, *Nichol, Robblee, Cravens, and Elvehjem,* 419
Blood cells, red, parasitized, ribonuclease activity, *Miller and Kozloff,* 105
Phenylalanine and tyrosine, interrelations, *Grau,* 661
Chromogenic substrate(s): *Huggins and Smith,* 391
Huggins and Lapides, 467
Citric acid: Biological fluids, determination, micro-, *Natelson, Lugovoy, and Pincus,* 597
Iso-, carbon dioxide fixation, *Grisolia and Vennesland,* 461
Citrulline: Arginine from, enzyme mechanism, *Ratner,* 761
Ornithine conversion, liver homogenate effect, *Cohen and Hayano,* 687
Cobalt: Metabolism, *Comar and Davis,* 379
Radioactive, tissue distribution, *Comar and Davis,* 379
Codecarboxylase: Pyridoxal-3-phosphate relation, *Gunsalus and Umbreit,* 415
Coenzyme(s): Tissue, *Robinson, Levitas, Rosen, and Perlzweig,* 653
Conjugase: Pteroylglutamic acid, inhibition and reversal, nucleic acid- and sulfhydryl-combining reagents, effect, *Mims, Swendseid, and Bird,* 367
Cozymase: Enzyme degradation, *Spaulding and Graham,* 711
Cystathionine: Stereoisomers, cleavage, liver effect, *Anslow and du Vigneaud,* 245

D

Deaminase(s): Biotin effect, *Lichstein and Umbreit,* 423
Dehydropeptidase: Zinc effect, *Yudkin and Fruton,* 421
Delphinine: Derivatives, *Jacobs and Huebner,* 209

Deuterium: Methionine methyl group, transmethylation study, use, *Simmonds, Cohn, and du Vigneaud*, 631
Diabetes: Glucose uptake, diaphragm, effect, *Krahl and Cori*, 607
Diaphragm: Glucose uptake, diabetes and adrenalectomy, effect, *Krahl and Cori*, 607
Glycogen synthesis, insulin effect, *Stadie and Zapp*, 55
Diet: Guinea pig, essential factor, *Simonsen and van Wagtendonk*, 239
Tissue phospholipides, relation, *Artom and Fishman*, 587
Dihydrosphingosine: Brain and cerebrospinal cord cerebrosides, isolation, *Carter, Norris, Glick, Phillips, and Harris*, 269
Diisopropyl fluorophosphate: Plant acetylesterase, effect, *Jansen, Nutting, and Balls*, 417
Diphtheria: Toxoid, isolation and characterization, *Pillemer, Toll, and Badger*, 571

E

Enzyme(s): Arginine formation from citrulline, mechanism, *Ratner*, 761
Co-. *See* Coenzyme
Cozymase degradation, *Spaulding and Graham*, 711
Fluoroacetate effect, *Bartlett and Barron*, 67
See also Acetylesterase, Carboxypeptidase, Codecarboxylase, Conjugase, Cozymase, Deaminase, Dehydropeptidase, Esterase, Lipoxidase, Phenolsulfatase, Phosphorylase, Ribonuclease, Ribonucleinase, Transminase, Tryptophanase
Erythrocyte(s): *See* Blood cell, red
Escherichia coli: Mutant strain, leucine utilization, *Simmonds, Tatum, and Fruton*, 483
Pterin and sulfonamide synergism, relation, *Daniel and Norris*, 747
Tryptophanase, resolution and purification, *Wood, Gunsalus, and Umbreit*, 313
Esterase: Acetyl-, plant, diisopropyl fluorophosphate effect, *Jansen, Nutting, and Balls*, 417
Esterase—*continued:*
Determination, colorimetric, *p*-nitrophenol acyl esters as substrates, *Huggins and Lapides*, 467
Estrone: Bile, isolation, pregnancy, *Pearlman, Rakoff, Cantarow, and Paschkis*, 173

F

Fatty acid(s): Determination, colorimetric, micro, *Bloor*, 671
Normal, separation and determination, distribution studies, *Sato, Barry, and Craig*, 501
Fermentation: Oxidative reaction mechanism, *Meyerhof and Oesper*, 1
Fluoroacetate: Bacterial metabolism, effect, *Kalnitsky and Barron*, 83
Enzymes, effect, *Bartlett and Barron*, 67
Pyruvate metabolism, effect, *Bartlett and Barron*, 67
Tissue metabolism, effect, *Bartlett and Barron*, 67
Yeast metabolism, effect, *Kalnitsky and Barron*, 83
Folic acid: Determination, *Daniel and Kline*, 739
Food(s): Valine determination, microbiological, *Horn, Jones, and Blum*, 719

G

Germine: Hexanetetracarboxylic acid, *Huebner and Jacobs*, 181
Glucose: Diaphragm, uptake, diabetes and adrenalectomy, effect, *Krahl and Cori*, 607
Glucose-1-phosphate: Decomposition, arsenate effect, *Doudoroff, Barker, and Hassid*, 147
Glutamic: -Aspartic transaminase, resolution and purification, *O'Kane and Gunsalus*, 425
Glutamic acid: Pteroyl-. *See* Pteroylglutamic acid
Glycerol ether(s): Naturally occurring, *Baer and Fischer*, 337
Glycogen: Synthesis, diaphragm, insulin effect, *Stadie and Zapp*, 55
Growth: Bacteria, pterins, synthetic, effect, *Daniel and Norris*, 747

Growth—*continued:*
Lactic acid bacteria, oleic acid and related compounds, effect, *Williams, Broquist, and Snell,* 619
Lactobacillus arabinosus, *p*-aminobenzoic acid, pteroylglutamic acid, and related compounds, effect, *Lampen and Jones,* 133
— *casei*, lipide effect, *Williams and Fieger,* 399
Niacin-tryptophan-deficient diets, effect, *Henderson, Deodhar, Krehl, and Elvehjem,* 261
Streptobacterium plantarum, *p*-aminobenzoic acid, pteroylglutamic acid, and related compounds, effect, *Lampen and Jones,* 133
Guinea pig: Diet essential, *Simonsen and van Wagtendonk,* 239

H

Hemoglobin: Lipoxidase, *Watts and Peng,* 441
Hetisine: *Jacobs and Huebner,* 189
Hexanetetracarboxylic acid: Cevine, *Huebner and Jacobs,* 181
Germine, *Huebner and Jacobs,* 181
Histamine: Purification for bioassay, *McIntire, Roth, and Shaw,* 537
Histidine: L-, metabolism, *Tesar and Rittenberg,* 35
Hydroxyproline: Oxidation, periodate effect, *Carter and Neville,* 301

I

Injury: Blood serum proteins, effect, *Gjessing, Ludewig, and Chanutin,* 551
Insulin: Glycogen synthesis, diaphragm, effect, *Stadie and Zapp,* 55
Isoatisine: *Huebner and Jacobs,* 515
Isocitric acid: Carbon dioxide fixation, *Grisolia and Vennesland,* 461

J

Jervine: *Jacobs and Huebner,* 635

K

Kidney: Oxidations, kojic acid effect, *Klein and Olsen,* 151
Kojic acid: Kidney oxidations, effect, *Klein and Olsen,* 151
Liver oxidations, effect, *Klein and Olsen,* 151

L

Lactic acid: Bacteria, growth, oleic acid and related compounds, effect, *Williams, Broquist, and Snell,* 619
—, mineral requirements, *MacLeod and Snell,* 351
Lactobacillus arabinosus: *p*-Aminobenzoic acid effect, *Lampen and Jones,* 133
Pterin and sulfonamide synergism, relation, *Daniel and Norris,* 747
Pteroylglutamic acid effect, *Lampen and Jones,* 133
Lactobacillus casei: Growth, lipide effect, *Williams and Fieger,* 399
Lactose: Dietary, tissue phospholipides, effect, *Artom and Fishman,* 587
Leucine: Derivatives, *Escherichia coli* mutant strain, utilization, *Simmonds, Tatum, and Fruton,* 483
Lipide(s): *Lactobacillus casei* growth, effect, *Williams and Fieger,* 399
Phospho-. *See* Phospholipide
Sphingo-. *See* Sphingolipide
Lipoxidase: Hemoglobin, *Watts and Peng,* 441
Muscle extract, *Watts and Peng,* 441
Soy bean, *Kies,* 121
Liver: Biotin fixation, *Ochoa, Mehler, Blanchard, Jukes, Hoffmann, and Regan,* 413
Carbon dioxide fixation, *Ochoa, Mehler, Blanchard, Jukes, Hoffmann, and Regan,* 413
Cystathionine stereoisomers, cleavage, effect, *Anslow and du Vigneaud,* 245
Homogenates, ornithine conversion to citrulline, effect, *Cohen and Hayano,* 687
Metabolism, antistiffness factor, *in vitro*, effect, *Simonsen and van Wagtendonk,* 239
Oxidations, kojic acid effect, *Klein and Olsen,* 151
Testosterone metabolism to Δ^4- andro-

Liver—*continued:*
stenedione-3,17, effect, *Clark and Kochakian*, 23
Testosterone metabolism to *cis*-testosterone, effect, *Clark and Kochakian*, 23

M

Manganese: Biological material, determination, micro-, catalysis use, *Kun*, 509
Determination, microbiological, *Bentley, Snell, and Phillips*, 343
Mannitol: Blood plasma, determination, *Corcoran and Page*, 165
Urine, determination, *Corcoran and Page*, 165
Metabolism: Tissue, fluoroacetate effect, *Bartlett and Barron*, 67
Methionine: Transmethylation, deuterium in methyl group, use, *Simmonds, Cohn, and du Vigneaud*, 631
Methylnicotinamide: N^1-, acetone and, condensation product, fluorescent, *Robinson, Levitas, Rosen, and Perlzweig*, 653
Mineral(s): Lactic acid bacteria, requirements, *MacLeod and Snell*, 351
Muscle: Adenylic acid nitrogen, rejuvenation *in vivo*, isotopic nitrogen in study, *Kalckar and Rittenberg*, 455
Extract, lipoxidase, *Watts and Peng*, 441

N

Niacin: -Tryptophan-deficient diets, growth effect, *Henderson, Deodhar, Krehl, and Elvehjem*, 261
Nicotinamide: N^1-Methyl-, acetone and, condensation product, fluorescent, *Robinson, Levitas, Rosen, and Perlzweig*, 653
Nitrogen: Muscle, adenylic acid, rejuvenation *in vivo*, isotopic nitrogen in study, *Kalckar and Rittenberg*, 455
Nitrophenol: *p*-, acyl esters, esterase determination, colorimetric, substrates, *Huggins and Lapides*, 467
Nitrophenyl sulfate: *p*-, phenolsulfatase determination, substrate, *Huggins and Smith*, 391
Nuclease: Ribo-, blood cell, red, parasitized, chick, activity, *Miller and Kozloff*, 105
Nucleic acid: Combining reagents, pteroylglutamic acid conjugase, effect, *Mims, Swendseid, and Bird*, 367
Yeast, ribonucleinase action, *Schmidt, Cubiles, Swartz, and Thannhauser*, 759
Nucleinase: Ribo-, yeast nucleic acid, action, *Schmidt, Cubiles, Swartz, and Thannhauser*, 759
Nucleotide(s): Pyridine, tissue, determination, *Robinson, Levitas, Rosen, and Perlzweig*, 653

O

Oleic acid: Lactic acid bacteria growth, effect, *Williams, Broquist, and Snell*, 619
Related compounds, lactic acid bacteria growth, effect, *Williams, Broquist, and Snell*, 619
Organic compound(s): Identification, micro, distribution studies, *Sato, Barry, and Craig*, 501
Ornithine: Citrulline, relation, liver homogenate effect, *Cohen and Hayano*, 687
Oxidative reaction: Fermentation, mechanism, *Meyerhof and Oesper*, 1

P

Pancreas: Protein B, crystalline, proteolytic activity, *Keith, Kazenko, and Laskowski*, 227
Penicillin(s): G, determination, *Grenfell, Means, and Brown*, 527
Naturally occurring, *Grenfell, Means, and Brown*, 527
Peptidase: Carboxy-, crystalline, *Neurath, Elkins, and Kaufman*, 221
Dehydro-, zinc effect, *Yudkin and Fruton*, 421
Periodate: Hydroxyproline oxidation, effect, *Carter and Neville*, 301
Phenolsulfatase: Determination, *p*-nitrophenyl sulfate as substrate, *Huggins and Smith*, 391

Phenylalanine: Adrenalin, radioactive, biological synthesis from, *Gurin and Delluva*, 545
Tyrosine and, interrelations, chick, *Grau*, 661
Utilization, *Albanese, Irby, and Lein*, 731
Phospholipide(s): Cleavage, brain, *Sperry*, 675
Tissue, diet relation, *Artom and Fishman*, 587
—, dietary lactose, effect, *Artom and Fishman*, 587
Phosphorylase: Sucrose, bacterial, *Doudoroff, Barker, and Hassid*, 147
Pigment(s): Carotenoid, Carr-Price colors, temperature effect, *Caldwell and Hughes*, 97
Plant: Acetylesterase, diisopropyl fluorophosphate effect, *Jansen, Nutting, and Balls*, 417
Transaminases, *Leonard and Burris*, 701
Pregnancy: Bile estrone, isolation, *Pearlman, Rakoff, Cantarow, and Paschkis*, 173
Proline: Hydroxy-, oxidation, periodate effect, *Carter and Neville*, 301
Protein(s): B, pancreas, crystalline, proteolytic activity, *Keith, Kazenko, and Laskowski*, 227
Blood serum, injury effect, *Gjessing, Ludewig, and Chanutin*, 551
Valine determination, microbiological, *Horn, Jones, and Blum*, 719
Proteolysis: Pancreas protein B, crystalline, activity, *Keith, Kazenko, and Laskowski*, 227
Pterin(s): Sulfonamide and, synergism, *Escherichia coli, Staphylococcus aureus*, and *Lactobacillus arabinosus*, relation, *Daniel and Norris*, 747
Synthetic, bacterial growth, effect, *Daniel and Norris*, 747
Pteroylaspartic acid: Pteroylglutamic acid, relation, *Hutchings, Mowat, Oleson, Stokstad, Boothe, Waller, Angier, Semb, and SubbaRow*, 323
Pteroylglutamic acid: Conjugase, inhibition and reversal, nucleic acid- and sulfhydryl-combining reagents, effect, *Mims, Swendseid, and Bird*, 367
Lactobacillus arabinosus and *Streptobacterium plantarum*, effect, *Lampen and Jones*, 133
Pteroylaspartic acid, relation, *Hutchings, Mowat, Oleson, Stokstad, Boothe, Waller, Semb, and SubbaRow*, 323
Pyridine: Nucleotides, tissue, determination, *Robinson, Levitas, Rosen, and Perlzweig*, 653
Pyridoxal phosphate: Function, *Wood, Gunsalus, and Umbreit*, 313
Pyridoxal-3-phosphate: Codecarboxylase relation, *Gunsalus and Umbreit*, 415
Pyruvate: Metabolism, fluoroacetate effect, *Bartlett and Barron*, 67

R

Ribonuclease: Blood cell, red, parasitized, chick, activity, *Miller and Kozloff*, 105
Ribonucleinase: Yeast nucleic acid, action, *Schmidt, Cubiles, Swartz, and Thannhauser*, 759

S

Selachyl alcohol: *Baer and Fischer*, 337
Geometrical isomer, *Baer and Fischer*, 337
Soy bean: *See* Bean
Sphingolipide(s): Biochemistry, *Carter, Norris, Glick, Phillips, and Harris*, 269
Carter, Glick, Norris, and Phillips, 285
Carter, Norris, and Rockwell, 295
Sphingosine: Chemical constitution, *Carter, Glick, Norris, and Phillips*, 285
Dihydro-, brain and cerebrospinal cord cerebrosides, isolation, *Carter, Norris, Glick, Phillips, and Harris*, 269
-Related compounds, synthesis, *Carter, Norris, and Rockwell*, 295
Staphylococcus aureus: Pterin and sulfonamide synergism, relation, *Daniel and Norris*, 747
Steroid(s): Testosterone metabolism to, liver effect, *Clark and Kochakian*, 23

Streptobacterium plantarum: *p*-Aminobenzoic acid effect, *Lampen and Jones*, 133
Pteroylglutamic acid effect, *Lampen and Jones*, 133
Streptomycin: Blood, determination, chemical, *Boxer and Jelinek*, 491
Cerebrospinal fluid, determination, chemical, *Boxer and Jelinek*, 491
Sucrose: Decomposition, arsenate effect, *Doudoroff, Barker, and Hassid*, 147
Phosphorylase, bacterial, *Doudoroff, Barker, and Hassid*, 147
Sulfate(s): Thiocyanate sulfur conversion to, *Wood, Williams, and Kingsland*, 251
Sulfhydryl: -Combining reagents, pteroylglutamic acid conjugase effect, *Mims, Swendseid, and Bird*, 367
Sulfonamide(s): Pterins and, synergism, *Escherichia coli, Staphylococcus aureus*, and *Lactobacillus arabinosus*, relation, *Daniel and Norris*, 747
Sulfur: Thiocyanate sulfate conversion, *Wood, Williams, and Kingsland*, 251

T

Testosterone: *cis*-, testosterone metabolism, liver effect, *Clark and Kochakian*, 23
Metabolism, liver effect, *Clark and Kochakian*, 23
— to Δ^4-androstene-3,17, liver effect, *Clark and Kochakian*, 23
— — *cis*-testosterone, liver effect, *Clark and Kochakian*, 23
Thiocyanate: Sulfur, sulfate conversion, *Wood, Williams, and Kingsland*, 251
Tissue(s): Metabolism, fluoroacetate effect, *Bartlett and Barron*, 67
Phospholipides, diet relation, *Artom and Fishman*, 587
—, dietary lactose, effect, *Artom and Fishman*, 587
Tocopheryl phosphate: α-, cozymase degradation, effect, *Spaulding and Graham*, 711
Toxin(s): Immunochemistry, *Pillemer, Toll, and Badger*, 571
Toxoid(s): Diphtheria, isolation and characterization, *Pillemer, Toll, and Badger*, 571
Immunochemistry, *Pillemer, Toll, and Badger*, 571
Transaminase(s): Aspartic-alanine, *O'Kane and Gunsalus*, 433
Glutamic-aspartic, resolution and purification, *O'Kane and Gunsalus*, 425
Plant, *Leonard and Burris*, 701
Tryptophan: -Niacin-deficient diets, growth effect, *Henderson, Deodhar, Krehl, and Elvehjem*, 261
Urine, *Berg and Rohse*, 725
Tryptophanase: *Escherichia coli*, resolution and purification, *Wood, Gunsalus, and Umbreit*, 313
Tyrosine: Phenylalanine and, interrelations, chick, *Grau*, 661

U

Urine: Mannitol determination, *Corcoran and Page*, 165
Tryptophan, *Berg and Rohse*, 725

V

Valine: Foods, determination, microbiological, *Horn, Jones, and Blum*, 719
Proteins, determination, microbiological, *Horn, Jones, and Blum*, 719
Veratrine: Alkaloids, *Huebner and Jacobs*, 181
Jacobs and Huebner, 635
Vitamin(s): A, Carr-Price colors, temperature effect, *Caldwell and Hughes*, 97
C. *See also* Ascorbic acid
H. *See also* Biotin

Y

Yeast: Metabolism, fluoroacetate effect, *Kalnitsky and Barron*, 83
Nucleic acid, ribonucleinase action, *Schmidt, Cubiles, Swartz, and Thannhauser*, 759

Z

Zinc: Dehydropeptidase, effect, *Yudkin and Fruton*, 421
